1. Description of the product: The label claims that the product helps in retain healthy skin and texture.
2. The objective of the patch test was to evaluate the skin compatibility and safety of the product in its intended user population (children and teenagers aged 6–19 years) by assessing any signs of erythema or oedema following topical application.
3. The objective of the patch test is to prove that the product causes no skin irritation (Erythema and Oedema) and is safe to use.
4. The patch test was performed on 24 volunteers consisting of male and female children and teenagers aged between 6 and 19 years under the supervision of a qualified dermatologist.
5. The test included a positive control - Sodium Lauryl Sulphate 3% w/w
6. The area being tested was observed 24 hours and 48 hours later.
7. The below data indicates that there was no reaction to the oil by any of the volunteers and that it is safe to use.

**TEST FOR SAFETY EVALUATION OF ANIMADO MULTIVITAMIN BODY
LOTION**
